

VIRTUALATM®

Modernize Your ATM Testing Platform

Automation. Accuracy. Accessibility.

VirtualATM is an enterprise-class testing platform specifically designed to run and test your company's ATM application software. Web-based, virtualized, centralized, and AI-assisted intent-driven testing means that your teams can easily test and collaborate any time and from anywhere.

AI-driven Development Causing a Testing Bottleneck?

ATM environments are evolving rapidly, driven by AI-led development efforts, network mandates, security patches, customer expectations. But testing approaches haven't kept up. In many organizations, testing operations can no longer keep up the pace.

Leading financial institutions are changing how they test.
